[G-5] Computer Analysis of Holy Days

1947 A.D. - 2100 A.D.

{Updated 1/14/15}

The following analysis is a computer comparison of holy days using the reference data from the REFERENCE DAY CALENDAR. I constructed a computer program to search for the Biblical numbers contained in Daniel and the Revelation. The search involved subtracting the reference dates for all combinations of holy days. It was my hope that by searching for these numbers in relation to the Holy Days of Israel I might be able to figure out how some of the numbers fit together. For each holy day count I searched for not only the number in particular but also one less than. For example:

If I searched for the number 1335 days I would also search for 1334 at the same time. If the difference between two dates is 1334 days this actually means there are exactly 1335 days by Jewish count [which counts the start and finish date {see note on Holy Days regarding Pentecost (Leviticus 23)}].

The numbers searched for were:

3635 --> 2300+1335
3590 --> 2300+1290
3560 --> 2300+1260
2625 --> 1335+1290
2595 --> 1335+1260
2550 --> 1290+1260
2300
1335
1290
1260

The tremendous volume of data I received was overwhelming. There are 2344 occurrences of these numbers between 1947 A.D. and 2100 A.D.. What is immediately obvious is that all of these day counts between Jewish holy days occur quite often on the modern Jewish calendar! Due to the large quantity of data I have not had time to reach any conclusions from the data at this time. I am presenting this data for analysis by others. Perhaps by working together we may learn more than any one of us could learn individually.

Do I expect to be able to calculate the date of the Rapture? No, but I do suspect that after the rapture of the Church, the Jews will be able to calculate the exact day of Armageddon when the Lord comes to set up His Millennial Kingdom.

Holy Day	Weekday	Jewish	Gregorian	Julian	Reference	Difference
Christmas (Dec. 25)+	Saturday	09 Kislev 23, 5709	12/25/1948	2432910	+000225
