

[G-6] Easter {Modern -- Gregorian} 1948 - 2100

The official date for Easter was set by the Nicean Council decree in 326 A.D. and is based upon an agreed upon chart which in theory keeps the passover after the vernal {spring} equinox. The dictionary definition which states that Easter is the first Sunday after the first full moon that occurs on or after March 21 closely follows the chart, but is not technically accurate. The following dates are based on the correct formula for computing the dates based upon the Nicean Council Easter chart.

{Jewish dates are based on the modern Jewish calendar; Gregorian dates are our modern B.C./A.D. calendar; Julian dates are based on the astronomical star date used by observatories. Reference dates are computed from May 14, 1948 when Israel became a new nation.} [Computed using maratime.exe and verified with multiple other sources.]

Holy Day	Weekday	Jewish	Gregorian	Julian	Reference
Easter (Modern)+	Sunday	13 Adar II 17, 5708	3/28/1948	2432638	-000047
